About Me

I am a business management postgraduate whose experience focuses on safeguarding digital infrastructure (cyber security) while aligning secure architectures with strategic public sector objectives. At BP Batam, I led the deployment of the National Digital Signature Project, effectively securing and modernizing critical public administration workflows. Currently, at the National Cyber and Crypto Agency (BSSN), I develop comprehensive risk management strategies for government institutions by conducting thorough asset audits, identifying critical vulnerabilities, and establishing rigid compliance baselines. Leveraging structured maturity measurement frameworks, I advise public sector IT leaders on cybersecurity governance and resilience. I reinforce these strategic initiatives with deep technical capabilities in cyber incident preparedness, data-driven security analysis, and information security awareness, utilizing data analytics to identify threat patterns and drive evidence-based risk mitigation. I further strengthened my analytical and communication skills by transitioning into data analytics through a full stack data analytics program at revou where i developed advanced proficiency in SQL, Microsoft excel, python and data visualization. This unique intersection of business management acumen and technical data expertise enables me to help organizations build resilient compliance frameworks, optimize operational data, and implement secure, data-backed governance.

Education

Prasetiya Mulya University Master of Management, Business Management	Sep 2019 - Nov 2021
Budi Luhur University Bachelor of Computer Science	Sep 2000 - May 2006
National Crypto Academy Diploma, Crypto Analysis	Sep 1996 - Sep 1999

Working Experiences

Cryptographer The National Cyber and Crypto Agency (BSSN)	Dec 2023 – Present
--	---------------------------

Government Institution

- Formulated risk management strategies for multiple government agencies by auditing their asset inventories, successfully identifying security gaps, and establishing proactive mitigation roadmaps.
- Elevated cybersecurity governance standards across public sector institutions by mentoring IT leaders and introducing structured maturity measurement frameworks.
- Analyzed institutional infrastructure data to build data-driven security baselines, ensuring compliance with national cybersecurity regulations.

Senior Government Public Relations Officer The National Cyber and Crypto Agency (BSSN)	Dec 2020 - Nov 2023
---	----------------------------

Government Institution

- Designed and executed national cybersecurity literacy campaigns, increasing public awareness regarding phishing, data privacy, and digital hygiene.
- Collaborate with cross-functional technical teams to translate complex threat intelligence into easy-to-understand and actionable advisory alerts for public consumption to improve the organization's cybersecurity.
- Measured campaign reach and community engagement metrics to continuously optimize the agency's public education strategies.

Head of the Media Campaign and Public Opinion Sub-Division The National Cyber and Crypto Agency (BSSN) <i>Government Institution</i>	Apr 2018 - Dec 2020
---	----------------------------

- Managed the official website and digital media channels of the National Cyber and Crypto Agency, ensuring accurate and secure dissemination of public security notices.
- Led digital content strategies that scaled cybersecurity awareness, directly increasing citizen engagement with safe internet practices.
- Monitored and analyzed public sentiment data regarding cyber threats to guide internal communication strategies during national data incidents.

Head of Crypto Material Section Data Processing and Information System Center, Batam Indonesia Free Zone Authority (BP Batam) <i>Government Institution</i>	Oct 2015 - Apr 2018
--	----------------------------

- Led the National Digital Signature Project, successfully deploying secure cryptographic authentication to digitize public administration workflows.

- Hardened enterprise email infrastructure, reducing corporate vulnerabilities and ensuring secure, reliable communications across the Free Zone Authority.
- Coordinated risk assessments on data center operations, eliminating legacy security bottlenecks to meet national protection baselines.

IT Security Analyst | National Crypto Agency

Nov 1999 - Sep 2015

Government Institution

- Conducted technical vulnerability assessments on core government information systems, identifying critical software and network weaknesses.
- Evaluated system architecture designs to provide actionable security recommendations, preventing potential data breaches and unauthorized access.
- Authored comprehensive technical risk reports for executive management to justify security budget allocations and infrastructure upgrades.

Skills

Hard Skills : Data Analytics & Visualization (Full-Stack Data Analytics, Structured Data Storytelling, Tableau), Programming & Libraries (Python), Database Management (SQL), Security & Risk (Cyber Incident Preparedness & Response, Information Security Awareness).

Soft Skills : Cognitive Abilities (Analytical & Critical Thinking), Leadership & Communication (Crisis Management & Resilience, Cross-Border Collaboration)

Certifications

Cyber Incident Preparedness and Response, Issued by Singapore Cooperation Programme	Nov 2025
Full Stack Data Analytics, Issued by RevoU	Feb 2026
Google Career Certificates for Cybersecurity, Issued by Google Indonesia	Apr 2024
Certified Secure Computer User v2, Issued by EC-Council	Jun 2022
Network Security, Issued by UTL Technologies Bangalore	Nov 2009
